

I'M A SUCCESS

I trade with Cayman because I feel at home with their advice. I've taken risks in my lifetime to achieve financial success and their aggressive trading, suggestions, excellent daily research, and trading advice reflect my thinking.

I don't have the time to manage my investments on a daily basis — I trust Cayman Associates.

I enjoy belonging to the best yacht club, a fine tuned Jaguar, and gambling in Monte Carlo. I like the best and Cayman Associates is the best.

My investment objective is not to be trading with a herd of buffalos, or talking with newly recruited sales-

men about mini contracts. I'm a serious investor with risk capital.

At Cayman all substantial accounts are personally supervised by the President of the firm, who understands my financial goals.

Regular accounts are personally supervised by a thoroughly experienced account manager keenly aware of each client's investment objectives.

* Those who desire it, can have daily phone contact, or telex wire.

Since Cayman trades on all commodity exchanges, my trading can be global. Yes, the best costs more, but can you afford to be without it?

Investors who can not afford risk should not trade commodities, those who do can make thousands in a day or lose a predictable amount with Cayman's program.
